Capstone Project Report Format for Computer Department

Academic Year: 2026-27

Sequence in which Pages should be arranged in the Report:

- Title Page
- Certificate Page

  Certificate of **Industrial Project** from Industry (If any)
- Report Approval
- Declaration
- Acknowledgement
- Course Outcomes & CO-PO-PSO Mapping (specific to your project)
- Table of Contents

  1. Chapter Index
  2. List of Figures
  3. List of Tables
- Abstract (200 to 300 words)
- Chapters

References (papers + books +Patent)

Appendix - I

1.IPR Documents Proof :-

- Research Paper published in Conference / Journal
- Certification of publication/presentation

2. Award certificate for project competition (if any)

3. Progress review sheet 1 and 2

Note : One Video Presentation :- Folder link will be shared in the mail

Index

Title **Page No.**

Abstract

Chapter 1: Introduction

1.1 Introduction

1.2 Motivation

1.3 Problem Definition

1.4 Existing Systems

1.5 Lacuna of the existing systems

1.6 Relevance of the Project

1.7 **Alignment with the United Nations SDGs**

Chapter 2: Literature Survey & Analysis

A. Brief Overview of Literature Survey

B. Related Works

2.1 Research Papers Referred

a. Abstract of the research paper

b. Inference drawn

2.2 Patent search

Links 1. European Patent

2. US patent

2.3. Inference drawn

2.4 Comparison with the existing system

2.5 Feasibility Analysis

a. Technical Feasibility

b. Economic and Financial Feasibility - Proposed budget

c. Cost-effectiveness analysis

d. Operational feasibility & Risk and mitigation analysis

e. Environmental and sustainability feasibility

f. Legal, ethical and privacy feasibility

2.6 Expected Outcomes / Deliverables

Chapter 3: Requirement Gathering for the Proposed System

3.1 Introduction to requirement gathering

3.2 Functional Requirements

3.3 Non-Functional Requirements

3.4. Hardware, Software and tools utilized

3.5 Constraints

Chapter 4: Proposed Design

4.1 Block diagram of the system

4.2 Modular design of the system

4.3 Detailed Design

4.4 Project Scheduling & Tracking using Timeline / Gantt Chart

4.5 Sustainability by Design Decisions

Chapter 5: Implementation of the Proposed System

5.1. Methodology employed for development

5.2 Algorithms and flowcharts for the respective modules developed

5.3 Datasets source and utilization

Chapter 6: Testing of the Proposed System

6.1 Introduction to testing

6.2. Types of tests Considered

6.3 Various test case scenarios considered & its Results

6.4 Inference drawn from the test cases

Chapter 7: Results and Discussion

7.1. Screenshots of User Interface (UI) for the respective module

7.2. Performance Evaluation measures

7.3. Input Parameters / Features considered

7.4. Graphical and statistical output

7.5. Comparison of results with existing systems

7.6. Inference drawn

7.7 **Sustainability Impact Assessment and Rubric Justification**

Chapter 8: Conclusion

8.1 Limitations

8.2 Future Scope

References

Appendix

1. IPR Document Details

- Paper published
- Certificate of publication
- Plagiarism report
- Project review sheet

2. Competition certificates

VIVEKANAND EDUCATION SOCIETY'S INSTITUTE OF TECHNOLOGY

An Autonomous Institute Affiliated to the University of Mumbai

DEPARTMENT OF COMPUTER ENGINEERING

CAPSTONE PROJECT–II

PROJECT REPORT

[ENTER THE APPROVED PROJECT TITLE]

Submitted in partial fulfilment of the requirements for the

Bachelor of Engineering (B.E.) Degree in Computer Engineering

Semester VII | Academic Year 2026–27

Submitted by

[Student Name 1] – [Class / Roll No.]

[Student Name 2] – [Class / Roll No.]

[Student Name 3] – [Class / Roll No.]

[Student Name 4] – [Class / Roll No.]

Project Mentor

[Name and Designation]

A. Y. 2026–27

General Instructions

- Report should include proper table of content
- Figure/Table should be appropriately named & should be included in list of Figures / Tables.
- The report should be justified.
- Line spacing should be 1.5.
- Fonts for Heading/ Section / subsection / Body Text)

Heading 1 (Times New Roman 20 Bold)

Heading 2 (Times New Roman 16 Bold)

Heading 3 (Times New Roman 14 Bold)

Heading 4 (Times New Roman 14)

Body Text (Times New Roman 12)

Formatting guidelines

Element	Required format
Font	Times New Roman throughout
Chapter heading (Heading 1)	20 pt, bold
Section heading (Heading 2)	16 pt, bold
Subsection heading (Heading 3)	14 pt, bold
Body text	12 pt, justified
Line spacing	1.5 for body text
Figures and tables	Number sequentially by chapter; add descriptive captions and include them in the relevant lists
Contents	Update the Table of Contents, List of Figures and List of Tables after final formatting
References	Use one consistent citation style throughout; follow the department-approved style and cite every source used

Final quality checklist

- Keep the page sequence specified in this template.
- Ensure the title, student names, roll numbers, mentor details and academic year are accurate.
- Use original writing; cite all external ideas, figures, datasets, code, papers and patents.
- Include evidence for implementation, testing, validation, performance and deployment claims.
- Check that every figure/table is numbered, captioned and referred to in the text.

- Attach the required IPR/publication evidence, plagiarism report, AI-content detection report, competition certificates (if applicable), and Progress Review Sheets 1 and 2.
- Add the video presentation using the folder/link communicated by the department; do not embed a broken or access-restricted link.
- Obtain mentor guidance and the required signatures/approvals before final submission.

Note: **Where a signature, grade, approval or certificate must be issued by the Institute, mentor, examiner or industry partner, leave the designated space for the authorized person. Do not self-certify or fabricate approvals.**

Declaration

We declare that this written submission represents our ideas in our own words and where others' ideas or words have been included, we have adequately cited and referenced the original sources. We also declare that we have adhered to all principles of academic honesty and integrity and have not misrepresented or fabricated or falsified any idea/data/fact/source in our submission. We understand that any violation of the above will be cause for disciplinary action by the Institute and can also evoke penal action from the sources which have thus not been properly cited or from whom proper permission has not been taken when needed.

ACKNOWLEDGEMENT

We are thankful to our college Vivekanand Education Society's Institute of Technology for considering our project and extending help at all stages needed during our work of collecting information regarding the project.

It gives us immense pleasure to express our deep and sincere gratitude to **Assistant Professor** (**Project Guide**) for her kind help and valuable advice during the development of project synopsis and for her guidance and suggestions.

We are deeply indebted to our Principal **Dr. (Mrs.) J.M. Nair** and the Head of the Computer Department **Dr. (Mrs.) Nupur Giri** for giving us this valuable opportunity to do this project.

We express our hearty thanks to them for their assistance without which it would have been difficult to finish this project report successfully.

We convey our deep sense of gratitude to all teaching and non-teaching staff for their constant encouragement, support and selfless help throughout the project work. It is a great pleasure to acknowledge the help and suggestion, which we received from the Department of Computer Engineering.

We wish to express our profound thanks to all those who helped us in gathering information about the project. Our families too have provided moral support and encouragement several times.

DEPARTMENT OF COMPUTER ENGINEERING

COURSE OUTCOMES FOR CAPSTONE PROJECT–II

Course Outcome	Description
CO1	Implement and integrate all modules of the proposed system effectively.
CO2	Perform testing, debugging, validation, and performance optimization of the developed solution.
CO3	Analyze project outcomes using appropriate engineering tools and metrics.
CO4	Demonstrate deployment readiness, usability, security, scalability, and sustainability considerations.
CO5	Analyze, interpret, and present research outcomes effectively using appropriate research methodologies, analytical tools, and presentation techniques.
CO6	Present and defend the complete project professionally through demonstrations, presentations, and comprehensive technical documentation.

CO–PO–PSO Mapping Table

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2
CO1	2	3	3	–	3	–	–	–	3	–	2	3	3
CO2	2	3	2	3	3	–	–	–	2	–	2	3	2
CO3	2	3	2	3	3	–	–	–	–	2	2	3	2
CO4	2	2	3	2	3	2	3	2	–	–	3	3	3
CO5	2	3	–	3	3	–	–	2	–	3	2	2	2
CO6	–	–	–	–	2	–	–	2	3	3	2	2	2

Mapping scale: 3 = High correlation; 2 = Moderate correlation; 1 = Low correlation; – = No direct correlation.

TABLE OF CONTENTS

[In Microsoft Word, use References → Table of Contents → Automatic Table after applying heading styles. Update the table after all editing and pagination are complete.]

LIST OF FIGURES

[Insert figure number, caption and page number for every figure in the report.]

LIST OF TABLES

[Insert table number, caption and page number for every table in the report.]

LIST OF ABBREVIATIONS (IF REQUIRED)

[List abbreviations alphabetically with their full forms.

ABSTRACT

[Write 200–300 words. Briefly state the problem and its significance, the project objective, proposed approach/methodology, major technologies or datasets, key implementation and evaluation outcomes, and the main conclusion. Include quantitative results where available. Avoid citations, unexplained abbreviations and claims not supported by the report.]

Keywords: [Provide 4–6 relevant keywords]

CHAPTER 1: INTRODUCTION

1.1 Introduction

[Introduce the application domain, context and need for the project.]

1.2 Motivation

[Explain the practical, technical, research or societal motivation.]

1.3 Problem Definition

[State the specific problem, target users/stakeholders, scope and intended outcome clearly.]

1.4 Existing Systems

[Describe relevant existing approaches or systems, supported by citations.]

1.5 Lacunae in Existing Systems

[Identify limitations or gaps supported by the literature and comparison; avoid unsupported claims.]

1.6 Relevance of the Project

[Explain expected relevance, beneficiaries, application context and potential impact.]

1.7 Alignment with the United Nations Sustainable Development Goals (SDGs)

Identify only the UN Sustainable Development Goals directly relevant to your project. Explain how the project objectives or features relate to the selected SDGs. Where possible, identify a relevant SDG target and provide measurable evidence or an indicator.

Do not claim an SDG impact that is not supported by the project scope or results.

SDG alignment table

SDG No. and Name	**Relevant SDG Target**	**Project Component / Objective**	**Expected or Demonstrated Contribution**	**Indicator / Evidence**
[SDG number and name]	[Target number or description]	[Relevant module or objective]	[Specific contribution]	[Metric, test result or other evidence]

[Additional SDG, if applicable]	[Relevant target]	[Project feature]	[Contribution]	[Evidence]

Instructions for students

- Select SDGs based on a genuine connection to the project.
- Explain the relationship rather than listing SDG names alone.
- Include evidence wherever available.
- Mention SDG alignment in the abstract only when relevant and justified.

CHAPTER 2: LITERATURE SURVEY

2.1 Brief Overview of the Literature Survey

[Explain the search scope, keywords, databases/sources and selection criteria used, where applicable.]

2.2 Related Works / Research Papers Referred

[For each important paper, provide the complete citation, problem addressed, method, dataset/setting, main findings, limitations and inference relevant to your project.]

Paper / citation	Method / approach	Key findings	Limitations / inference
[Author, year]	[Method]	[Finding]	[Inference]
[Author, year]	[Method]	[Finding]	[Inference]

2.3 Patent Search

[Document relevant patent searches, including search terms, patent title/number, jurisdiction, link, status/date checked and relevance. Include European Patent Office and US patent search links where relevant. Do not claim legal freedom to operate without qualified review.]

2.4 Inference Drawn

[Synthesize what the literature and patent search indicate; explain how the proposed project responds to identified gaps.]

2.5 Comparison with Existing Systems

System / paper	Features / method	Strengths	Limitations	Difference in proposed work
[Existing system 1]	[Details]	[Strengths]	[Limitations]	[Comparison]
[Existing system 2]	[Details]	[Strengths]	[Limitations]	[Comparison]

2.6 Feasibility Analysis

[Students should provide supporting evidence through a cost estimate, resource requirements, risk assessment, expected benefits, and measurable outcomes.]

CHAPTER 3: REQUIREMENT GATHERING FOR THE PROPOSED SYSTEM

3.1 Introduction to Requirement Gathering

[Describe stakeholders, requirement-gathering methods and scope.]

3.2 Functional Requirements

[List the functions the system must perform. Use uniquely identified, testable requirements such as FR-01, FR-02, etc.]

3.3 Non-Functional Requirements

[Specify measurable expectations for performance, security, usability, reliability, accessibility, scalability and maintainability, as applicable.]

3.4 Hardware, Software, Technologies and Tools Utilized

Category	Tool / specification	Purpose / version
Hardware	[Processor, RAM, device/sensors]	[Purpose]
Software / OS	[Name and version]	[Purpose]
Languages / frameworks	[Name and version]	[Purpose]
Database / cloud / APIs	[Name and version]	[Purpose]
Testing / analytics / version control	[Name and version]	[Purpose]

3.5 Constraints

[Describe project boundaries, resource/time constraints, dependencies, data availability, ethical/privacy requirements and assumptions.]

CHAPTER 4: PROPOSED DESIGN

4.1 Block Diagram of the System

[Insert a legible, labelled system block diagram. Explain the main components and data/control flow below it.]

4.2 Modular Design of the System

[Describe each module, its responsibilities, inputs/outputs, interfaces and dependencies.]

4.3 Detailed Design

[Include relevant architecture, UML/ER diagrams, database schema, API design, sequence/activity diagrams, security design or model design as applicable. Explain each diagram.]

4.4 Project Scheduling and Tracking

[Insert a Gantt chart/timeline showing tasks, milestones, planned vs. actual progress, dependencies and risks. Explain any deviations.]

4.5 Sustainability-by-Design Decisions

[Explain design choices that reduce unnecessary compute/storage/network use, extend hardware life, improve accessibility/inclusion, protect privacy or reduce operational waste, only where relevant. State trade-offs.]

CHAPTER 5: IMPLEMENTATION OF THE PROPOSED SYSTEM

5.1 Methodology Employed for Development

[Describe the development workflow, environment, design choices and implementation sequence.]

5.2 Algorithms and Flowcharts for Modules Developed

[Provide pseudocode/algorithms and clear flowcharts for important modules. Explain inputs, outputs and relevant implementation decisions. Avoid pasting large code listings into the main chapter.]

5.3 Dataset Sources and Utilization

[For each dataset, state source/link, access date, licence/permission, size, features, preprocessing, train/validation/test split and intended use. For projects without datasets, describe the data or test inputs used.]

CHAPTER 6: TESTING OF THE PROPOSED SYSTEM

6.1 Introduction to Testing

[State the testing objectives, scope, environment and strategy.]

6.2 Types of Tests Considered

[Select relevant tests, such as unit, integration, system, usability, security, performance, compatibility, acceptance or model validation. Explain why each is appropriate.]

6.3 Test Case Scenarios

Test ID	Module / requirement	Input / precondition	Expected result	Actual result	Status / evidence
TC-01	[Module]	[Input]	[Expected]	[Actual]	[Pass/Fail + reference]
TC-02	[Module]	[Input]	[Expected]	[Actual]	[Pass/Fail + reference]
TC-03	[Module]	[Input]	[Expected]	[Actual]	[Pass/Fail + reference]

6.4 Inference Drawn from Test Cases

[Summarize pass/fail trends, defects identified, fixes applied, unresolved issues and evidence supporting validation.]

CHAPTER 7: RESULTS AND DISCUSSION

7.1 User Interface Screenshots for Respective Modules

[Insert clear screenshots with figure numbers and captions. Explain the workflow and what each screenshot demonstrates. Remove personal, confidential or sensitive information.]

7.2 Performance Evaluation Measures

[Define each metric, why it is suitable, the test setup and measured values. For ML/AI systems, report suitable metrics and evaluation protocol; for other systems, report relevant latency, throughput, reliability, resource use or task success measures.]

7.3 Input Parameters / Features Considered

[Describe inputs, features, parameters, configuration values and their rationale.]

7.4 Graphical and Statistical Output

[Include labelled graphs/tables with units, legends, sample sizes and interpretation. State uncertainty or repeated-run information where appropriate.]

7.5 Comparison of Results with Existing Systems

[Compare with baselines or prior work using fair, clearly stated conditions. Cite sources and disclose differences in datasets, hardware, settings or metrics.]

7.6 Inference Drawn

[Explain what the evidence demonstrates, whether objectives were met, key trade-offs, limitations and unexpected results. Avoid claims beyond the evidence.]

7.7 SUSTAINABILITY IMPACT ASSESSMENT AND RUBRIC JUSTIFICATION

[Define the reporting boundary and period; identify material impacts; use indicators and a stated method; compare results with a baseline/target where possible; link relevant SDG targets; identify governance, social and environmental effects; and disclose limitations and data gaps.]

7.7.1 Scope, boundary and evidence

[State project life-cycle stages and system boundary (e.g., development, training, hosting, usage, maintenance and disposal), reporting period, locations/users, included/excluded processes, data sources, assumptions and known gaps. Distinguish measured data from estimates.]

7.7.2 Material sustainability topics

[Identify which environmental, social and governance topics are material to this specific project and why. Consider energy/compute, emissions, water if relevant, materials/e-waste, accessibility, inclusion, user well-being, privacy/security, fairness, safety, accountability and community effects. ***Identify only whichever is applicable to your project****]*

Dimension / topic	**Project relevance and potential impact**	**Indicator / unit**	**Evidence source**	**Boundary / limitation**
Environment: energy / compute	[Why material / N/A rationale]	[kWh, runtime, cloud usage, proxy]	[Meter/log/provider data]	[Period / estimate]
Environment: emissions / travel	[Why material / N/A rationale]	[kg CO_2e, distance, proxy]	[Method / factor source]	[Scope / factor limits]
Environment: materials / waste	[Why material / N/A rationale]	[kg, reuse/recycling count]	[Inventory / record]	[End-of-life gap]
Social: access / inclusion / usability	[Affected users / groups]	[Task success, accessibility checks, user feedback]	[Test / survey]	[Sample size / bias]
Social: safety / well-being / community	[Potential benefit / harm]	[Incident count, outcome metric, feedback]	[Test / review / consented study]	[Ethics / sample limits]
Governance: privacy / security / fairness	[Data and decision risks]	[Vulnerabilities, access controls, bias checks]	[Audit / test evidence]	[Coverage / residual risk]

7.7.3 Sustainability targets and progress

[Set realistic project-specific targets where feasible. Identify baseline, target, time horizon, actual value, variance and corrective action. If no baseline exists, describe how it will be established.]

Topic / target	Baseline and date	Target / due date	Actual result	Status / corrective action
[e.g., reduce redundant compute]	[Baseline]	[Target]	[Measured result]	[Status/action]
[e.g., accessibility / privacy]	[Baseline]	[Target]	[Measured result]	[Status/action]
[e.g., waste / device reuse]	[Baseline]	[Target]	[Measured result]	[Status/action]

7.7.4 SDG alignment and evidence

[State whether the connection is design intent, expected contribution, tested output or demonstrated outcome. Avoid attributing broad SDG progress to a small prototype without evidence.]

7.7.5 Sustainability assessment rubric

Use the rubric below to make the basis for each rating transparent. Score only the evidence presented in the report. If a dimension is genuinely not applicable, explain why and mark N/A rather than assigning an arbitrary score. Mentor/examiner should apply the same descriptors consistently.

Criterion	Weight	0 – Not evidenced	1 – Initial	2 – Developing	3 – Strong
A. Scope, materiality and baseline	15%	No boundary or relevant topics	Boundary/ topics stated but vague; no	Boundary and material topics explained; baseline partly defined	Clear life-cycle boundary, justified material topics, reporting period

		identifie d	baseline rationale		and baseline/data gaps stated
B. Environmental/ resource impacts	20%	No relevant impact consider ed	Mentions impacts without method or evidence	Uses relevant indicator(s) with method and some evidence	Quantifies/esti mates relevant energy, emissions, materials/waste or explains N/A with sound rationale; method and limits disclosed
C. Social value, inclusion and safety	20%	No social effects consider ed	Benefits asserted without stakeholde r evidence	Stakeholders and relevant usability/acces sibility/safety measures identified	Impact on affected users assessed with suitable tests/feedback; inclusion, safety and limitations documented
D. Governance, privacy, security and ethics	20%	Risks not consider ed	Generic statements only	Relevant risks and controls documented; some verification	Data handling, consent/licensin g, security, fairness/accoun tability controls and test evidence clearly documented
E. SDG linkage and measurable targets	10%	No SDG/targ et linkage	SDGs listed without causal explanatio n	Relevant SDG target and plausible indicator linked to project	Target-level mapping, baseline/target/ indicator and supporting evidence; expected vs demonstrated impact distinguished
F. Measurement,	15%	No results or	Anecdotal results; no	Metrics/metho ds/results	Evidence traceable and

transparency and improvement		limitations	method or limitations	partly reproducible; limitations noted	repeatable; assumptions, uncertainty, gaps and corrective/future actions disclosed

Scoring method: rate each criterion 0–3. Weighted points = (criterion rating ÷ 3) × criterion weight. Total sustainability rubric score = sum of weighted points, out of 100. Suggested interpretation for formative feedback only: 0–39 = evidence insufficient; 40–59 = emerging; 60–79 = satisfactory; 80–100 = strong. These bands are proposed for consistent project review and are not copied from SL2 or an external standard; the department may approve or revise them.

7.7.6 Evidence and limitations statement

[State which sustainability indicators were measured, estimated, tested qualitatively or not assessed; identify the evidence artefact (table, log, screenshot, survey, calculation, audit or source); explain data quality and limitations. Do not describe expected outcomes as achieved outcomes.]

CHAPTER 8: CONCLUSION

8.1 Limitations

[State current technical, data, evaluation, deployment or scope limitations candidly.]

8.2 Future Scope

[Identify realistic next steps, improvements, extensions or deployment/research opportunities.]

APPENDIX – I: PROJECT EVIDENCE AND SUPPORTING DOCUMENTS

A. IPR / Research Publication Evidence

- Research paper published / accepted / presented (if applicable), with full citation and status evidence.
- Certificate of publication or presentation (if applicable).
- Patent / IPR filing or related evidence, if applicable. Clearly distinguish filed, published, granted and planned status.

B. Project Competition / Award Certificates

[Attach relevant certificates for project competitions or awards, if any. If not applicable, write "Not applicable."]

C. Progress Review Sheets

[Attach Progress Review Sheet 1 and Progress Review Sheet 2 in the prescribed format.]

D. Additional Supporting Material

[Add only relevant supporting material such as consent/ethics approval where required, supplementary test results, user manuals or deployment evidence. Do not include confidential information without authorization.]

E. Video Presentation

[Insert the video presentation folder link shared by the department. Check that the link opens for authorized reviewers.]
